🎓 EDUCATION

Master of Science

Physics

San Francisco State
University

Bachelor of Science

Physics

Minor in Mathematics

Northern Arizona
University

🔧 SKILLS

Frontend

- ❖ React
- ❖ Angular
- ❖ Next.js
- ❖ TypeScript / JavaScript
- ❖ Three.js

Backend

- ❖ Java
- ❖ Spring Boot
- ❖ Node.js

Databases

- ❖ SQL
- ❖ PostgreSQL

Tools

- ❖ Git
- ❖ Maven
- ❖ Docker
- ❖ Jest
- ❖ React Testing Library

Full Stack Software Engineer with 7+ years of experience building scalable web and mobile applications. Expertise in React, system architecture, and AI model evaluation, with end-to-end ownership of production systems.

PROFESSIONAL EXPERIENCE

Senior Full Stack Software Engineer

📅 Jan 2025 - Present

DataAnnotation

📍 Bellevue, WA

- Trained and evaluated large language models using production-grade frontend and backend code as gold-standard references
- Designed high-quality code exemplars and edge-case scenarios to improve model correctness, performance, and security
- Diagnosed and corrected non-performant generated code to align outputs with real-world engineering standards
- Simulated complex application and database workflows to establish AI performance baselines

Nov 2023 - Dec 2024

In recovery from emergency surgery

Software Development Engineer

📅 May 2023 - October 2023

Cloudvirga

📍 Bellevue, WA

- Delivered customer-facing features in collaboration with product managers and stakeholders
- Architected and embedded modern React applications within a legacy Angular codebase
- Built data-rich React pages (KPIs, charts, tables) with deep-linkable filtering and sorting
- Established CI/CD workflows and resolved live production issues to improve application stability

Software Development Engineer

📅 Aug 2018 - April 2023

Centaur Games

📍 Tempe, AZ

- Modernized a legacy JavaScript codebase by migrating to a scalable React architecture
- Designed and owned the architecture for 20 games from conception through production deployment
- Developed opponent AI systems and a realistic 3D physics engine using Three.js
- Led a cross-platform process converting web apps into native mobile apps, delivering 18 iOS and 20 Android apps
- Built a reusable component library adopted across the organization
